

this program will ask you to input the shape you want to create (triangle or square)

then it will ask you to input the size of the shape

Example for square

```
Shape: square
```

```
Size: 5
```

```
*****
```

```
*      *
```

```
*      *
```

```
*      *
```

```
*****
```

Example for triangle

```
Shape: triangle
```

```
Size: 5
```

```
|      *
```

```
      ***
```

```
      *****
```

```
      *****
```

```
*****
```

If you did not input square or triangle, it will print not valid

```
Shape: a
```

```
not valid
```
